Introduction & Overview

How to avoid brands made with genetically modified organisms (GMOs)

Genetic Engineering (GE) or Genetic Modification (GM) of food involves the laboratory process of artificially inserting genes into the DNA of food crops or animals. The result is called a genetically modified organism or GMO. GMOs can be engineered with genes from bacteria, viruses, insects, animals, or even humans. Most Americans say they would not eat GMOs if labeled, but unlike most other industrialized countries, the U.S. does not require labeling. This Non-GMO Shopping Guide is designed to help reclaim your right to know about the foods you are buying, and help you find and avoid GMO foods and ingredients. It does not cover other potentially harmful ingredients, allergens, colors or additives.

Tips for avoiding GM crops

TIP #1: BUY ORGANIC

Certified organic products are not allowed to contain any GMOs. Therefore, when you purchase products labeled “100% organic,” “organic,” or “made with organic ingredients,” all ingredients in these products are not allowed to be produced from GMOs. For example, products labeled as “made with organic ingredients” only require 70% of the ingredients to be organic, but 100% must be non-GMO.

TIP #2: LOOK FOR “NON-GMO” LABELS

Companies may voluntarily label products as “non-GMO.” Some labels state “non-GMO” while others spell out “Made Without Genetically Modified Ingredients.” Products that carry the Non-GMO Project Seal have third party verification as being in compliance with Non-GMO Project standards for GMO avoidance. Some products limit their claim to only one particular “At-Risk” ingredient such as soy lecithin, listing it as “non-GMO.” Look for dairy products labeled “No rBGH or rBST,” or “artificial hormone-free.”

TIP #3: AVOID AT-RISK INGREDIENTS

Avoid products made with any of the crops that are GM. Most GM ingredients are products made from the “Big Four:” corn, soybeans, canola, and cottonseed, used in processed foods. Some of the most common genetically engineered Big Four ingredients in processed foods are:

Corn

- » Corn flour, meal, oil, starch, gluten, and syrup
- » Sweeteners such as fructose, dextrose, and glucose
- » Modified food starch*

Soy

- » Soy flour, lecithin, protein, isolate, and isoflavone
- » Vegetable oil* and vegetable protein*

Canola Canola oil (also called rapeseed oil)

Cotton Cottonseed oil

**May be derived from other sources*

In addition, GM sugar beet sugar recently entered the food supply. Look for organic and non-GMO sweeteners, candy and chocolate products made with 100% cane sugar, evaporated cane juice or organic sugar, to avoid GM beet sugar. Sugar Anything not listed as 100% cane sugar

TIP #4: BUY PRODUCTS LISTED IN THIS SHOPPING GUIDE

Keep this Guide with you whenever you shop. Store it inside your reusable shopping bag, put into your coupon holder or check book, or leave it in your car.

BOLD with an asterisk * denotes brands with products enrolled in the Non-GMO Project's third party GMO Avoidance Verification Program.

Fruits & Vegetables

Very few fresh fruits and vegetables for sale in the U.S. are genetically modified. Novel products such as seedless watermelons are NOT genetically modified. Small amounts of zucchini, yellow crookneck squash, and sweet corn may be GM. The only commercialized GM fruit is papaya from Hawaii—about half of Hawaii's papayas are GM.

Meat Fish & Eggs

No genetically modified fish, fowl, or livestock is yet approved for human consumption. However, plenty of non-organic foods are produced from animals raised on GM feed such as grains. Look for wild rather than farmed fish to avoid fish raised on genetically modified feed, and 100% grass-fed animals.

Meat & Fish: Non-GMO

Organic Prairie, Tropical Traditions, Vital Choice

Eggs: Non-GMO

Egg Innovations Organic
Eggland's Best Organic
Horizon Organic
Land O'Lakes Organic

Nest Fresh Organic
Organic Valley
Pete and Jerry's Organic Eggs
Wilcox Farms Organic

Alternative Meat Products

Many alternative meat products are processed and include ingredients that can be genetically engineered, so give the ingredient lists close attention to avoid the Big Four at-risk ingredients, especially soy.

Non-GMO

365 Brand (Whole Foods)*

Amy's
Bountiful
Eco Vegan
Small Planet Tofu
Sunshine Burger

The Simple Soyman
Vitasoy
Wildwood
White Wave
Woodstock Farms*

May contain GMO ingredients

Boca, unless organic (Kraft)
Gardenburger

Morningstar Farms, unless organic soy line (Kellogg)

Dairy Products

Some U.S. dairy farms inject the genetically engineered hormone rbGH, also called rbST, into their cows to boost milk production. Organic dairy products are rbGH-free and do not use GM grains as feed. Products with label that indicates cows free of rbGH or rbST may come from cows fed GM feed. Many alternative dairy products are made from soybeans and may contain GM materials.

Dairy Products: Non-GMO

Alta Dena Organics
Butterworks Farm
Harmony Hills Dairy
Horizon Organic
Morningland Dairy
Nancy's Organic Dairy*
Natural by Nature
Organic Valley

Radiance Dairy
Safeway Organic Brand

WholeSoy*
Wildwood
Yves The Good Slice
Zen Don

May contain GMO ingredients 8th Continent

Baby Foods & Infant Formula

Milk or soy protein is the basis of most infant formulas. The secret ingredients in these products are often soy or milk from cows injected with rbGH. Many brands also add GMO-derived corn syrup, corn syrup solids, or soy lecithin.

Non-GMO

Baby's Only Organic
Bella Baby
Earth's Best
Gerber
HappyBaby
Mom Made Meals
Organic Baby*

PediaSmart

Nabisco Bars (Kraft)

PowerBar (Nestle)
Quaker Granola

Candy, Chocolate Products & Sweeteners

Many sweeteners, and products like candy and chocolate that contain them, can come from GMO sources. Look for organic and non-GMO sweeteners, candy and chocolate products made with 100% cane sugar, evaporated cane juice or organic sugar to avoid GM beet sugar, and watch out for soy lecithin in chocolates and corn syrup in candies. The sweetener aspartame is derived from GM microorganisms. It is also referred to as NutraSweet® and Equal® and is found in over 6,000 products, including soft drinks, gum, candy, desserts, yogurt, tabletop sweeteners, and some pharmaceuticals such as vitamins and sugar-free cough drops.

Chocolate:

Non-GMO

Chocolove
Endangered Species*
Green & Black's Organic
Kopali Organics

Lifesaver (Kraft)
Nestlé

Sweeteners:

Non-GMO

Eden*
Sweet Cloud* Tropical Traditions
Woodstock Farms*

Soda Juices & Other Beverages

Most juices are made from GMO-free fruit (avoid papaya though, as it could be GMO), but the prevalence of corn-based sweeteners—e.g. high-fructose corn syrup—in fruit juices is cause for concern. Many sodas are primarily comprised of water and corn syrup. Look for 100-percent juice blends.

Non-GMO

After the Fall
Big Island Organics

May Contain GMO Ingredients

Coca-Cola (Fruitopia, Minute Maid, Hi-C, NESTEA)
Hansen Beverage Company
Hawaiian Punch (Procter and Gamble)
Kraft (Country Time, Kool-Aid, Crystal Light, Capri Sun, Tang)

Libby's (Nestlé)
Ocean Spray
Pepsi (Tropicana, Frappuccino, Gatorade, SoBe, Dole)
Sunny Delight (Procter and Gamble)

Note: This guide was compiled based on company statements, not genetic testing. Any product labeled as Non-GMO indicates that its manufacturing process is designed to avoid GMOs, but consumers should be aware that GM contamination is possible due to natural pollen movement, weather events, seed contamination, or human error. Hence there is no guarantee such products are 100% free of GMOs.

Center for Food Safety's participation in this guide does not necessarily imply endorsement

Invisible GM Ingredients

Processed foods often have hidden GM sources (unless they are organic or declared non-GMO). The following are ingredients that may be made from GMOs..

Aspartame, also called NutraSweet®, Equal Spoonful®, Canderel®, BeneVia®, E951

baking soda
canola oil (rapeseed)
caramel color
cellulose
citric acid
cobalamin (Vit. B12)
colorose
condensed milk
confectioners sugar
corn flour
corn gluten
corn masa
corn meal
corn oil
corn sugar
corn syrup
cornstarch
cyclodextrin
cystein
dextrin
dextrose
diacetyl
diglyceride
erythritol
Equal
food starch
fructose (any form)
glucose
glutamate
glutamic acid
gluten
glycerides
glycerin
glycerol
glycerol monooleate

glycine
hemicellulose
high fructose corn syrup (HFCS)
hydrogenated starch
hydrolyzed vegetable protein
inositol
inverse syrup
invert sugar
inversol
isoflavones
lactic acid
lecithin
leucine
lysine
maltitol
malt
malt syrup
malt extract
maltodextrin
maltose
mannitol
methylcellulose
milk powder
milo starch
modified food starch
modified starch
mono and diglyceride
monosodium glutamate (MSG)
NutraSweet
oleic acid
Phenylalanine
phytic acid
protein isolate
shoyu
sorbitol
soy flour

soy isolates
soy lecithin
soy milk
soy oil
soy protein
soy protein isolate
soy sauce
starch
stearic acid
sugar (unless cane)
tamari
tempeh
teriyaki marinade
textured vegetable protein
threonine
tocopherols (Vit E)
tofu
trehalose
triglyceride
vegetable fat
vegetable oil
Vitamin B12
Vitamin E
whey
whey powder
xanthan gum

Ascorbic acid (Vitamin C) although usually derived from corn, is probably not GM because it is not likely made in North America.
